## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Burton A. Amernick on August 22, 2005.

The application has been amended as follows:

**Claims 38 and 39 are cancelled.**

The reason is that applicant is required under the 35 U.S.C. 121 to elect a single invention if two or more "independent and distinct" inventions are claimed in one application. In 37 CFR 1.141, the statement is made that two or more "independent and distinct inventions" may not be claimed in one application. Claims 38 and 39 are "independent" claims, directed to a patterned copper structure, and claims 4 – 8, 14 – 18, 20 – 26 and 43 – 48 are another "independent" claims that are directed to a method for fabricating a patterned copper structure. Since claims 38 and 39 are "independent" claims

Art Unit: 2815

and "distinct invention" over claims 4 – 8, 14 – 18, 20 – 26 and 43 – 48, claims 38 and 39 are cancelled (see bottom of this page for more details).

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 4 – 8, 14 – 18, 20 – 26 and 43 – 48, drawn to a method for fabricating a patterned copper structure, classified in class 438, subclass 652.
  - II. Claims 38 and 39, drawn to a patterned copper structure, classified in class 257, subclass 762.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as selectively depositing the copper into a hole to recess the copper with respect to the top surface of a dielectric material.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
